

Pennsylvania Child Care Innovation Summit

Child care is economic infrastructure. It supports Pennsylvania's workforce, strengthens employers, and contributes to long-term economic competitiveness. Creating a sustainable child care system will require coordinated action across business, government, philanthropy, and the early childhood sector.

The Pennsylvania Child Care Innovation Summit will bring cross-sector leaders together to examine practical solutions that are strengthening child care systems across Pennsylvania and the nation. Participants will explore employer-led strategies, sustainable financing and policy models, place-based partnerships, and opportunities for greater coordination across sectors.

ELIC brings together leaders and organizations representing diverse perspectives across Pennsylvania's child care and economic landscape. Sponsorship of the Summit reflects support for this cross-sector convening and does not imply ELIC endorsement of a sponsor's products, services, business model, or policy positions. Summit content, speakers, and outcomes remain independently determined by ELIC.

Investment Opportunities

Innovator \$10,000

Transformational Impact

Drive statewide solutions that support sustainable child care investment, strengthen Pennsylvania's workforce, and position child care as essential economic infrastructure.

Support Recognition
